

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I am retired and on a fixed income, something you rich and mighty leaches don't understand. You see I was never fortunate enough to be appointed to a position of power such as you have, one that if I rule in favor of big business, I get a high paying job. You see, were not all the dummy you think we are. We know what is going on in your circles and I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. Please try to be an honest, with a conscious person, instead of a greedy person who lives off the poor, you might sleep better at night, although I doubt if it bothers your kind. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair! Why are you always trying to take away the few crumbs we have left in life.

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Roy W. Wiant Sr.
